-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 29 October 2009.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Species I (Figures 1-5) in the reply filed on October 29, 2009 is acknowledged.

Applicant points out that claims 1, 9-15 and 20-23 read on the elected Species I. However, it appears that claims 13, 14 and 22 do not read on Species I.

In claim 13, the recitation "...said stationary element mounting portion extends radially outwardly from said stationary frame member cylindrical portion" is not shown in any of the figures 1-5.

In claim 14, the recitation "...said stationary element mounting portion being disposed radially inwardly of said stationary frame member cylindrical portion" is not shown in any of the figures 1-5.

In claim 22, the recitation "... a brake frame of said brake unit is made an integral portion continuous to said stationary frame member" is not shown in any of the figures 1-5. It appears that this describes figure 15.

Therefore, the only claims readable on Species I (figures 1-5) are 1, 9-12, 15, 20, 21 and 23.

Claims 2-8, 13, 14, 16-19, 22 and 24-28 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected non-elected, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on October 29, 2009.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 10, 11, 15 and 23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

With respect to claim 10, the recitation “said stationary frame”, in line 3, lacks positive antecedent basis in the claims.

With respect to claim 11, the recitation “said outer circumferential portion”, in lines 5-6, lacks positive antecedent basis in the claims.

With respect to claim 15, the recitation “said rotary member”, in line 5, lacks positive antecedent basis in the claims.

With respect to claim 23, the recitation “direction of assembly of said brake unit into said stationary frame member” is repeated in lines 2 and 3. Therefore, it is not understood what is meant. Also, what is meant by “direction of assembly”?

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 11, 12, 15, 20, 21 and 23 are rejected under 35 U.S.C. 102(b) as being anticipated by EP 1630120 to Hashiguchi.

With respect to claim 1, Hashiguchi, in figures 3 and 8-11 for example, teaches a stationary frame member 16; a main shaft 2; a stationary element 8 disposed to the stationary frame member; a rotary frame member (4, 5, 6) supported on the main shaft and extending in a radial direction in axial opposition to the stationary frame member; a rotary element 7 disposed to the rotary frame member in opposition to the stationary member; a brake unit 10 including a brake portion 10b extending through an opening 16b in the stationary frame member, the braking portion being radially guided by the opening; and a rope sheave 4 disposed to the rotary frame member for rotation therewith.

With respect to claims 11, 12 and 15, Hashiguchi teaches a stationary element mounting portion 16a; an annular member having an L-shaped cross section; an annular plate portion 15; a cylindrical portion 16a; and a rotary element mounting portion 6a.

With respect to claims 20, 21 and 23, Hashiguchi teaches the brake unit 10 is disposed within the axial dimensions of the stationary element mounting portion (15, 16) and is in direct opposition to the rotary frame member (4, 5, 6).

Allowable Subject Matter

Claims 9 and 10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
